## JLC Live Northwest

### New Booth & Products Get Big Response

"Fasco America Inc. displayed many BECK Fastener Group made fastening items in a newly designed booth at this year's recently concluded JLC Live Northwest show in Portland Oregon. More than 100 contractors visited the Fasco America Inc. booth hungry for product knowledge and excited to try the 6-1/4" maximum length "Jumbo Nailer" line up for timber frame, boat dock and pole barn applications to name a few. The Invisdeck® line of hidden deck fasteners including I-CLP for grooved composite and exotic exterior deck boards and B-CLP for non grooved boards was of equally high interest to contractors. The headliner of the show was the Beck Fastener Group signature SCRAIL® lineup featuring the SubLoc® SCRAIL® for squeak-less subfloor fastening and FasCoat® SCRAIL® for exterior deck applications."
